

KANESid SOLUTIONS

Add NFC/RFID or barcode to after-market gloves, sleeves, line hose, tools, sticks, grounds and test equipment. Improve operating efficiency while promoting safer operations & field compliance.

TEST LABS: Move rubber goods through the lab 3x faster than current manual methods of recording serial #'s. Imagine efficiently scanning gloves through the lab to auto-build reports and accurately record test results. Take the lead to promote advanced ID technology and data analytics solutions with your clients.

FIELD OPERATIONS: Make the most of your smart phones by scanning NFC/RFID or barcode enabled products to instantly:

- Record daily pre-trip inspections
- Scan and View testing/inspection status
- Identify or transfer ownership of items
- Get alerts for out-of-compliance PPE/Tools
- Take fast/accurate inventory of PPE/Tools
- Re-order lost or failed PPE/TOOLS/EQUIPMENT

HIGH VOLTAGE GLOVES

Seal a low cost **BARCODE LABEL** to your after-market natural rubber gloves and sleeves. This low profile label can be customized with your choice of color, company name/logo and comes standard with serialized barcode and human readable text.

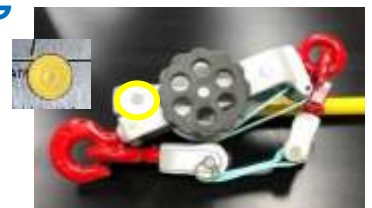

SLEEVES/HOSE/BLANKETS

Mark a **LASER BARCODE** on synthetic sleeves, blankets & line hose, along with a highly visible/durable logo and variable text fields. We'll help you determine the right technology to safely and accurately mark these assets.

TOOLS/STICKS/LIFTING GEAR

Tap-in a **TINY NFC/RFID PLUG CHIP** and scan with your smart phone. It's a proven solution for most tools or lifting gear with a metal component.

TEST EQUIPMENT/GROUNDS

NFC RFID ZIPTIE

Add low cost **NFC/RFID ZIPTIE, PEEL 'n STICK LABEL** or **HARD TAG** to track these assets.

RFID/Barcode LABEL

RFID HARD TAG
